Notes on boundary digitising:

*Proposed boundaries for LWSs are digitised to match Ordnance Survey Mastermap features wherever these appropriately describe the site boundary.

**When overlaid against other forms of mapping (as above), the LWS boundary may appear to overlap or misalign with features such as roads and buildings. This does not represent an error in the LWS boundary: basemaps often distort the true size and exact location of such features in order to improve legibility.
